Good morning Rick,

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP) I will take a look at the inquiry for HQs. We coordinate with the states at the PFAS sites we oversee. In addition, we also correspond with the counties on newly installed water wells, PWS hookups etc. I will put something together for your review by the end of the day. As far as the earlier FOIA request from Rita Tate pertaining to the Chemours Washington Works facility, we have not inspected nor have we formally requested any process information on GenX. Our only involvement has been our voluntary request for GenX monitoring of specific public and private water supplies. I will let you know if I think of anything else on this issue. Thanks.

Roger

Hi Roger,

Ex. 6 Personal Privacy (PP)

I'm not sure what your hours are right now, so let me know if you are not able to do this.

See the questions, below. Do we have anything historically with Chemours or from our part of the SDWA orders to ANG and Navy that would be responsive to these questions? If so, can you put together a few sentences to respond to these questions? Due date is 10 am tomorrow.

Thanks,

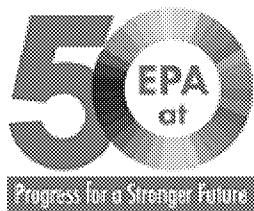

Rick

Just a friendly reminder that this request is due at 10:00 this morning. Thanks to those that already provided some good input! I would be great if we could come up with a couple more examples outside of FedFacs and Blades. Thanks again, Amie

Subject: INPUT NEEDED: PFAS FAQs for HQ Due 2/27

Importance: High

Hi all –

The White House is working on a list of PFAS FAQs. The RAs and DRAs received an email from HQ this morning looking for input on the questions below. I have created a SharePoint document for you to provide examples and suggestions based on your experiences working with communities and federal/state/local governments. Apologies for the quick turnaround, but can you please finalize your input by **10:00 am on Thursday, February 27**. Once I have your input, I will clean it up for Front Office review.

7. How do you conduct outreach to communities with potential contamination and how specifically do you reach remote and rural communities?

AO/Regions

8. Are you currently working with counties or other local government entities in your efforts to address PFAS contamination? If so, can you describe those relationships (ex., how it works, who is the main point of contact, how that relationship has been helping in improving outcomes at the local level)? Can you discuss the challenges and opportunities around building federal-local partnerships?

AO/Regions

9. Can you share any successful examples of your work with counties?

AO/Regions

10. What advice can you offer to communities to better coordinate with our federal partners on PFAS cleanups and PFAS materials issued?

OLEM/Regions
